[Doctor/Nurse's Name]:

Good [morning/afternoon], [Patient's Name]. I'm [Doctor/Nurse's Name], and I'm here to go over your recent lab results with you. Thank you for coming in today.

After carefully reviewing the tests, there are some areas of concern that we need to address. I understand that this might be difficult to hear, but I want you to know that we are here to support you every step of the way. The results show [briefly mention specific concerning result, e.g., elevated cholesterol levels, abnormal liver function, high blood sugar, etc.].

Let me explain what this means for your health. [Explain the results in a way the patient can understand: "For example, your blood sugar levels are higher than we'd like, and this suggests that you may be at risk for diabetes."].

[Doctor/Nurse's Name]:

It's important that we act on these results promptly. While these findings are concerning, they are also manageable with the right steps. Here's what we recommend moving forward:

1. **Next Steps:** We will [discuss additional tests, refer to a specialist, prescribe medication, or recommend lifestyle changes].
2. **Treatment Plan:** I'll work with you to create a plan that suits your needs and helps manage this condition. [Discuss medication, dietary changes, exercise, or other treatments as applicable].
3. **Follow-Up:** It's important to monitor your health closely. I'd like to schedule a follow-up appointment in [insert time frame] to reassess your progress and adjust the treatment plan if needed.
